Mission

The mission of the Public Utilities Department is to provide safe, efficient, effective delivery of reliable electric and gas service for the benefit of all customers. These services provide value to the greater Rocky Mount community by promoting economic prosperity, preserving public health and safety, and ensuring a viable future through responsible utilization of natural resources.

Department Description

The Public Utilities Department is responsible for safe, efficient, effective delivery of reliable electric and natural gas service to the City's ~ 30,000 electric and ~ 18,000 natural gas customers and for the City's internal communications systems including telephone, 800 MHz trunking radio and paging systems. The Administrative Division under the leadership of the Director of Utilities oversees the daily operation of the Electric Distribution, Gas Distribution, Energy Services, Utility Engineering and Communications Divisions.

Description

The Public Utilities Administrative Division, under the guidance of the Director of Utilities and the Utilities Operations Manager, oversees the daily operation of the Electric Distribution, Gas Distribution, Energy Services, Utility Engineering and Communications Divisions in the provision of safe, efficient, effective and reliable electric and natural gas service, and internal communications systems.

FY 2008 Highlights

- Developed long range plan that outlines operating and capital needs for future utility operations.
- Continued participation on APGA Board of Directors and NCAMES Board of Directors.
- Monitored natural gas and electricity purchases and evaluted options to reduce purchased energy costs.
- Developed gas purchasing agreement that provides opportunity for discount of future gas purchases.

FY 2009 Initiatives

- Continue monitoring of electric and gas revenues and expenditures to ensure rate efficiency.
- Monitor potential for electric rate increases and develop strategy, if necessary, for ensuring fiscal health and operating effectiveness in response to announced increase.
- Continue participation on the APGA Board of Directors and the NCAMES Board of Directors.
- Expand residential load management program installations and maintenance.

Description

The Communications Support Services Division plans, operates and maintains the City's communication systems in support of all city departments. This includes the City's 800 MHZ trunking radio system, pager system and the City's telephone system.

FY 2008 Highlights

- Completed installation and testing of backup radio tower site.
- Continued scheduled radio replacement.
- Continued to assist with planning and implementation of backup Emergency Operations Center.
- Performed preventative maintenance checks and repairs on City telephones and radios.
- Evaluted and implemented use of blackberry devices as part of City mobile phone program.

FY 2009 Initiatives

- Continue scheduled replacement of radios.
- Review and prepare billing for radio and phone usage for all City departments.

Description

The Energy Services division is responsible for residential and commercial load management, marketing and promoting all electric and natural gas programs and services, administering the Key Accounts program, and dispatching all crews to service all electric, natural gas, and water customers.

FY 2009 Overview

Begin testing load management switches on a rotating 6 year cycle. This will require that 2200 switches be tested each year.

FY 2009 Overview

Expand dispatch office hours to 24 hours per day, 7 days/week

FY 2009 Initiatives

- Dispatch all electric, natural gas, and water calls 24/7 from the dispatch office
- · Test load management switches in the field

| Performance Measures | FY2007 Actual | FY2008 Adopted | FY2008 Projected | FY2009 Adopted |
|---|------------------|-------------------|---------------------|-------------------|
| Input (Workload) | | | | |
| Load management switches tested. | N/A | N/A | N/A | 2200 |
| Output | | | | |
| Telephone requests for utility service. | N/A | N/A | 1000 | 1300 |
| Residential load management switches installed. | 115 | 300 | 340 | 500 |

Description

The Utilities Engineering Division is responsible for the planning and design of the City's electric and gas distribution systems for the delivery of safe, efficient, effective and reliable electric and natural gas service, and in order to meet load growth. It includes electric substation construction, operation and maintenance, electric metering operations, system mapping and modeling, and facility maintenance.

DIVISION SUMMARY Gas Distribution

Description

The Gas Division is responsible for the construction, operation and maintenance of the City's natural gas distribution system to provide safe, efficient, effective delivery of reliable natural gas service to our customers. It includes natural gas metering operations.

FY 2009 Overview

Steel gas main replacement program is designed to replace existing steel gas lines with new polyethelyne (plastic) gas lines. This will be a multiyear project.

| Performance Measures | FY2007 Actual | FY2008 Adopted | FY2008 Projected | FY2009 Adopted |
|---|------------------|-------------------|---------------------|-------------------|
| Input (Workload) | | | | |
| Large industrial/commercial gas meters tested | 8 | 8 | 13 | 27 |
| Output | | | | |

Mission

The mission of the Water Resources Department is to produce and distribute potable water for domestic and commercial use and to collect, treat and dispose of domestic and commercial wastewater. These services provide value to the greater Rocky Mount community by promoting economic prosperity, preserving public health and safety, and ensuring a viable future through responsible utilization of financial and natural resources.

Department Description

The mission of the Water Resources Department is the management of the potable water demands, treatment of the combined wastewater streams, and the administration of regulatory compliance of multiple NCDWQ permits within the Twin Counties. This vastly stated mission includes the production & distribution of a high quality potable water to our domestic & industrial customers, an adequate storage capacity to support our worst case scenario fire flow demands, the successful treatment of a waste stream to the highest standards permitted in the State, the foresight to manage an excess capacity which invites future growth, and the responsible oversight of our area's environmental health.

The successful completion of this mission promotes economic prosperity & preserves public health and safety while ensuring a viable future through responsible utilization of our most valuable natural resource.

Description

Administration is responsible for managing, planning, developing and coordinating the programs and activities of the Divisions of the Water Resources Department in consideration of City Policies and the ever changing State & Federal Permits & Regulations.

FY 2008 Highlights

- Successfully provided oversight of what has been deemed to be the 800-Year drought.
- Coordinated a multi-governmental coalition to provide common connections for three water purveyors.
- Initiated the City's compliance of a backflow/cross connection program.
- Initiated major revisions to the Sewer Use Ordinance.
- Served as Commissioner of the NCDWQ Wastewater Certification Board, and received reappointment for a second term.
- Supervised successful completion of two major wastewater treatment plant expansions.

FY 2009 Initiatives

- Continue participation in aggressive industrial recruitment in Twin Counties area.
- Continue efforts to strengthen water supply plan.
- Initiate City program on fats, oils, and grease (FOG).
- Initiate aggressive program to bring inflow and infiltration issues within acceptable levels.
- Implement a construction crew to alleviate City's primary dependency on contractors.

Description

The Technical Services Division provides analytical data, engineering services, technical expertise and process control review of the Divisions of the Water Resources Department.

FY 2008 Highlights

- Successfully initiated stream watch program of environmental assessment in response to drought.
- Spearheaded initiation of backflow/cross connection program.
- · Achieved full staffing with extraordinary recruitment.
- Successfully completed revisions to Sewer Use Ordinance.
- Provided leadership to Tar Pam Basin Association.
- Implemented Lab information management system, including modules for FOG and pretreatment.
- Provided officer leadership to NC Pretreatment Consortium.

FY 2009 Initiatives

- · Continue environmental monitoring.
- Implement FOG policy and enforcement plan.
- Review and amend staffing to better utilize talent and increase efficiency.
- Fully implement career ladder program.
- Continue oversight of all process parameters in water and wastewater operations.
- Continue leadership in both the Tarm Pam Basin Association and the NC Pretreatment Consortium.
- Evaluate and react to initiation of Tar Pam Basin Association's watershed sampling program.

Description

The Water Treatment Division is responsible for the resource management and production of potable water to the customer base meeting the analytical parameters set forth by the State and Federal Governments through the responsible and efficient operation of the City's Water Treatment Facilities. Under their charge is also inclusive of the elevated and ground storage facilities as well as the booster pump stations which define our three (3) pressure zones.

FY 2008 Highlights

- Successfully managed an ample water supply during the record setting drought of 2007.
- Met or exceeded all Water Quality Standards during extreme raw water treatment challenges.
- Successfully supervised 2 NPDES discharge permits with no violations.
- Met or exceeded all PWS LT2 parameters for DBP's through extreme conditions set forth by the drought of 2007.
- Provided leadership through serving on the NC Water Certification Board examination review.
- Implemented a record setting supplemental water supply program and modifications to recharge methods for the Old Mill Quarries.
- Provided leadership and support to Wilson/Rocky Mount emergency water main extension project.

FY 2009 Initiatives

- Continue to lead region in foresight in water conservation.
- Continue to operate efficiently in light of escalating treatment chemical costs.
- Fully implement the Career Ladder Program for employees within division.
- Certify Pchem ORC's to conduct NPDES Permit testing.
- Continue to provide leadership and promote fully trained Certified Operators within the water industry.
- Reconstruct primary portions of the ferric sludge handling facilities of both treatment plants.
- Upgrade SCADA System from data acquisition to supervisory control module.

DIVISION SUMMARY Water Services

Description

The Water Services Division is responsible for the successful maintenance and supervision of the potable water distribution system in coordination with its NCPWS Permit.

FY 2008 Highlights

- Saved millions of gallons of supply during the drought of 2007 through emergency repairs.
- Provided evidence of extraordinary low loss ratio during in-house water audit.
- Completed cast iron replacement projects in 3 locations.
- Assisted in the Wilson/Rocky Mount emergency water main connection by supervising 3 water systems at once.
- Exhibited the "perfect season" in Bac-T Distribution sampling.
- Assumed the role of "contractor" on the Brookview project.
- Continued an accelerated installtion rate for the automated meter reader (ARM) program.
- Performed successful maintenance on the Old Mill Quarry recharge feed line.

FY 2009 Initiatives

- Initiate an ISO Rating Program on all ssytem hydrants and association of color coding.
- Initiate an aggressive hydrant flushing program to "catch up" from drought of 2007.
- Initiate an aggressive 2" galvanized water main replacement program with requested staffing.
- Employ new NCPWS regulation pertaining to less than 20 psi pressure rule.
- Installed new water mains associated with 2008 annexation.
- Continue aggressive employee certification program as applied to Distribution Operators.
- Initiate GIS locating and maping of water and appurtenances.

| Performance Measures | FY2007 Actual | FY2008 Adopted | FY2008 Projected | FY2009 Adopted |
|-----------------------------|------------------|-------------------|---------------------|-------------------|
| Input (Workload) | | | | |
| Water meters replaced | 2000 | 2500 | 1200 | 3000 |
| Water main breaks | 130 | 100 | 85 | 100 |
| Output | | | | |
| Fire hydrants flushed | 2200 | 2200 | 300 | 2500 |
| Outcome (Effectiveness) | | | | |
| Discolored water complaints | 100 | 100 | 100 | 100 |

Description

The Wastewater Treatment Division is responsible for the treatment & reclamation of a very unique combined waste stream of vast originations: CRM domestic & industrial customer base, resale customers which include two (2) counties and four (4) municipalities, and acceptance of septic haulers inclusive of six (6) counties. The end product is supervised by one of the most stringent BNR permits in the State of North Carolina.

FY 2008 Highlights

- Completed and implemented startup of the Aerobic Digester Aeration Upgrade Project.
- Accomplished the "perfect season" in meeting BNR permit parameters.
- Successfully accomplished a full staff of State Certified Operators.
- Implemented a RAS wasting module which has improved sludge quality and lowered quantity.
- Revised to standard the Facility Risk Management Plan. Annual school of instruction offered to all area response teams.
- Served as host for State recognized affilitations in both wastewater and pretreatment.
- Chief Opeartor was recognized as runner-up North Carolina Wastewater Operator of the Year.

FY 2009 Initiatives

- Continue to research methodologies to maximize electric efficiency to realize greater savings with new digester equipment.
- Accomplish the "perfect season" in meeting BNR permit parameters.
- Fully implement the Career Ladder Program for employees in the division.
- Begin installation of SCADA and facility telemetry.
- Continue to provide leadership and promote full-trained Certified Operators within the wastewater industry.
- Host at least one state conference on an annual basis.
- Install and implement new MLSS return pumps in activated sludge system.

Description

The Sewer Services Division is responsible for the successful maintenance and supervision of the sewer system in coordination with its State Collection System Permit.

FY 2008 Highlights

- Responded in a professional manner to 2 SSO events.
- Initiated the first year of Lift Station SCADA program.
- Smoke tested and made corrections to Maple Creek and Beech Branch outfalls.
- Assumed the role of "contractor" on the Brookview project.
- Installed one generator and multiple quick disconnects on sewer lift stations.
- Achieved certified Collection System Operator status on 4 employees.
- Initiated the application of GIS mapping tools within the division.
- Exhibited strength in Sewer R/W Maintenance and aggressive beaver control measures.

FY 2009 Initiatives

- Exibit a zero SSO year of operation.
- Continue Lift Station SCADA Program to target full implementation within 4 years.
- Continue smoke testing program from NC-97 Lift Station to crossing at Tar River.
- Undertake more roles as "contractor" in repairs and extensions of sewer systems.
- · Continue lift station generator installation program.
- Install new sewer mains associated with 2008 annexation.
- Continue aggressive employee certification program as applied to Collection System Operations.
- Initiate GIS locating and mapping of collection system.

Mission

The mission of Stormwater Services is to provide maintenance, capital improvement, inspection and planning of the storm drainage system within the City limits. The Division is responsible for insuring that the City is in compliance with all state and federal stormwater regulations.

Programs within the Stormwater Services will include the maintenance of all open drainage ditches that are located with public rights of way or drainage easement; capital improvements program that will construct drainage improvements based on City Council approved priority list; inspection of existing detention and water quality ponds and development of basin wide drainage plans.

Description

The Stormwater Administration Division is charged with managing, planning, and developing the programs and activities of the Stormwater uility. This includes insuring compliance with state and federal stormwater regulations, programing capital priorities, and involving the public through education and participation initiatives.

FY 2008 Highlights

- Continued Stormwater Inventory Project.
- Continued to refine basin master planning to identify and prioritize needed capital improvements.
- Initiated construction of capital improvements along Springfield Road and Raleigh Street (US 64 Business) to improve drainage and reduce flooding frequency.

FY 2009 Initiatives

- Incorporated annexed areas into Stormwater Inventory Project and basin master planning.
- Continue work on improvements at Springfield Road and Raleigh Street.
- Construct improvements at Eastern Tar and Gay Branch.
- Evaluate financial performance to project future viability of projects and operations with anticipated revenues.

Description

The Stormwater Operations Division is responsible for maintenance and repair of the public stormwater drainage system ensuring that the system functions as efficiently as posiible. Activities include repair and replacement of failing pipes, and structures; clean out clogged pipes, culverts, inlets, minor creeks, and streams; repair, regrading, and retrofitting roadside ditches and canals with regard to existing infrastructure and environmental concerns and constrtaints.

FY 2009 Overview

The Stormwater Operations Division will monitor functionality of all stormwater infrastructure and ensuring necessary maintenance is performed in a timely manner, through the utilization of customer based response system, evaluation, and observation of existing components of the system; and implement aggressive actions to address new annexation area concerns..

FY 2008 Highlights

- Expanded use of growth retardent to control growth on major storm drain ditches and canals throughout the city.
- Assisted Dewberry in Storm Drain study and corrected all minor noted concerns during study.
- Continued maintaining all primary drainage channels through routine maintenance and stabilization.
- Completed inventory of drainage ditches throughtout the city for use in evaluating frequency of service and allocation of man power.
- Evaluated drainage systems in new annexation areas and established related maintenance concerns to address as well as designate maintenance asignment areas.
- Established educational and safety training programs as related to the industry on a monthly basis.
- Continued Maintenance program for all residential detention ponds based on current BMPs.
- Completed over 10,000 liner feet of storm drain ditch and channel bank restoration and stabilization by use of stone slope protection, ditch flowline trap installations, ditch level spreaders, seeding, and matting.

FY 2009 Initiatives

- Continue use of growth retardent to control vegetative growth along ditchs and major canals as funds permit.
- Continue maintenance of all ditches, channels, canals, pipes, culverts, and inlets through routine maintenance intervals.
- Utilize reorganization of street sweeping routes and operations to effectively utilize new equipment and reduce frequency of sweeping as much as posiible.
- Continue monthly safety and educational training for employees as related to the industry.
- Promote staff development in Certification of Pesticide Applications and Licensure.
